

Listing of Claims:

1. (Currently Amended): A personal care product comprising a liquid impermeable backsheet, a liquid permeable topsheet, and an absorbent composite located between said topsheet and said backsheet, said absorbent composite comprising an upper layer made of a first debonded pulp in an amount of from 80 to 95 weight percent, at most 20 weight percent binder, and having a density between about 0.03 and 0.15 g/cc and a basis weight between about 20 to 75 gsm, and a lower layer having from 80 to 95 weight percent of a second non-debonded or sulfite- type pulp ~~[[.]] different from said first pulp~~, at most 20 weight percent binder, and having a density greater than said upper layer and between 0.08 and 0.20 g/cc, and a basis weight between 120 and 200 gsm.
2. (Original): The personal care product of claim 1 wherein said absorbent composite upper layer has a density between about 0.04 to 0.10 g/cc.
3. (Original): The personal care product of claim 2 wherein said absorbent composite lower layer has a density between about 0.10 to 0.15 g/cc.
4. (Original): The personal care product of claim 1 wherein said absorbent composite is apertured.
5. (Currently Amended): The personal care product of claim 1 wherein said absorbent composite is colored via the addition of color to the binder.
6. (Original): The personal care product of claim 1 which is a diaper.
7. (Original): The personal care product of claim 1 which is a training pant.
8. (Original): The personal care product of claim 1 which is an incontinence product.
9. (Original): The personal care product of claim 1 which is a bandage.
10. (Original): The personal care product of claim 1 which is a feminine hygiene product.
11. (Currently Amended): An absorbent composite comprising an upper layer made of a first debonded pulp in an amount of about 90 weight percent, about 10 weight percent binder, and having a density about 0.04 g/cc and a basis weight of about 50 gsm, and a lower layer having about 90 weight percent of a second non-debonded or sulfite- type pulp ~~[[.]] different from said first pulp~~, about 10 weight percent binder, and having a density of about 0.12 g/cc, and a basis weight of about 150 gsm.

12. (Original): A personal care product comprising the absorbent composite of claim 11.

13. (Original): The absorbent composite of claim 11 wherein said composite has at least two layers.

14. (Original): The absorbent composite of claim 11 wherein said absorbent composite is made according to the airlaying process.

15. (Previously Presented): A personal care product comprising a liquid impermeable backsheet, a liquid permeable topsheet, and an absorbent composite located between said topsheet and said backsheet, said absorbent composite comprising an upper layer made of fully debonded pulp in an amount of from 80 to 95 weight percent, at most 20 weight percent binder, and having a density between about 0.03 and 0.15 g/cc and a basis weight between about 20 to 75 gsm, and a lower layer having from 80 to 95 weight percent non-debonded pulp, at most 20 weight percent binder, and having a density greater than said upper layer and between 0.08 and 0.20 g/cc, and a basis weight between 120 and 200 gsm.
